Executive Leadership 360° Assessment.

aoe
ARCHITECTURE OF EXCELLENCE™

The AOE Executive Leadership 360° Assessment is a comprehensive, psychologically informed leadership evaluation designed to provide executives, founders, senior leaders, and other high-performing professionals with a deeper understanding of their leadership effectiveness and developmental opportunities.

Grounded in the **Architecture of Excellence™** framework, the assessment integrates structured stakeholder interviews, competency-based analysis, and psychological insight to examine how individual qualities translate into behavior, how leadership is experienced by others, and how individual patterns interact with the demands of an organization.

THE ASSESSMENT PROCESS — FIVE STAGES

01

Initial Meeting

An initial meeting establishes the process and procedure, the objectives of the assessment, and the stakeholders to be interviewed. It also captures the leader's own perspective on their strengths, challenges, and priorities.

02

Stakeholder Interviews

Confidential interviews are scheduled and conducted with 8–10 employees or other stakeholders, such as direct reports, peers, supervisors, or board members. Each interview lasts approximately one hour.

03

Analysis Through the AOE Framework

Interview findings are examined through the seven pillars of the Architecture of Excellence™ framework, which serve as the leadership competencies for the assessment:

TRUTH	CONNECTION	BEING	VISION	MEANING	CREATION	EXCELLENCE

The analysis identifies recurring themes, strengths, potential blind spots, and differences between self-perception and stakeholder experiences.

04

Written Report

A written assessment, organized around the seven AOE competencies, presents key strengths, developmental opportunities, and individualized recommendations. The report is yours to keep.

05

Review Meeting

A private one-hour meeting to review the assessment outcomes, explore their implications, and establish priorities for continued leadership development.

Structure & Investment.

EXECUTIVE LEADERSHIP 360° ASSESSMENT

INVESTMENT

$15,000

ESTIMATED COMPLETION

4–6 weeks

Subject to stakeholder availability and assessment scope.

ASSESSMENT INCLUDES

- Initial meeting to establish process, procedure, and objectives
- Scheduling and confidential interviews of 8–10 employees or other stakeholders (approximately one hour each)
- Any correspondence necessary during the process
- Analysis of findings through the seven-pillar AOE competency framework
- Written assessment report organized around the AOE competencies, with individualized recommendations (yours to keep)
- One-hour review meeting of assessment outcomes

TWO PATHWAYS FOR ENGAGEMENT

01 Standalone Executive Assessment

The assessment may be undertaken as an independent engagement, providing a comprehensive evaluation of leadership effectiveness and a written roadmap for continued professional development.

02 Assessment Followed by Private Consulting

The assessment may alternatively serve as the foundation for an individualized leadership development engagement through AOE's 1:1 Private Consulting services.

Where continued consulting is elected, assessment findings inform a tailored developmental strategy focused on strengthening leadership competencies, addressing identified challenges, and translating insight into sustained behavioral and professional development.

Continued private consulting is optional and contracted separately.

PROFESSIONAL SCOPE & CONFIDENTIALITY

The Executive Leadership 360° Assessment is a nonclinical leadership development and consulting service. Although informed by Dr. Schulhofer's training and professional experience as a licensed psychologist, it does not constitute psychotherapy, psychological diagnosis, mental health treatment, or crisis services.

Stakeholder feedback is treated confidentially and synthesized to reduce individual identifiability. Complete anonymity cannot be guaranteed. The intended recipients and permitted uses of assessment findings are established before the engagement begins.

The assessment is intended for professional development and is not designed to serve as a standalone basis for high-stakes employment decisions.
